[String To Int In Dev C_](#)

A screenshot of a Windows console window titled "C:\TC\BIN\NEW.EXE". The window has a blue title bar and standard Windows window controls (minimize, maximize, close) on the right. The console output is as follows:

```
Enter any String:  
I love C++  
Reverse of the string is: ++C evol I
```

These are given as follows – scanf atoi Typecasting; Here is an example of converting char to int in C language, Example.. Oct 23, 2018 In C language, there are three methods to convert a char type variable to an int.

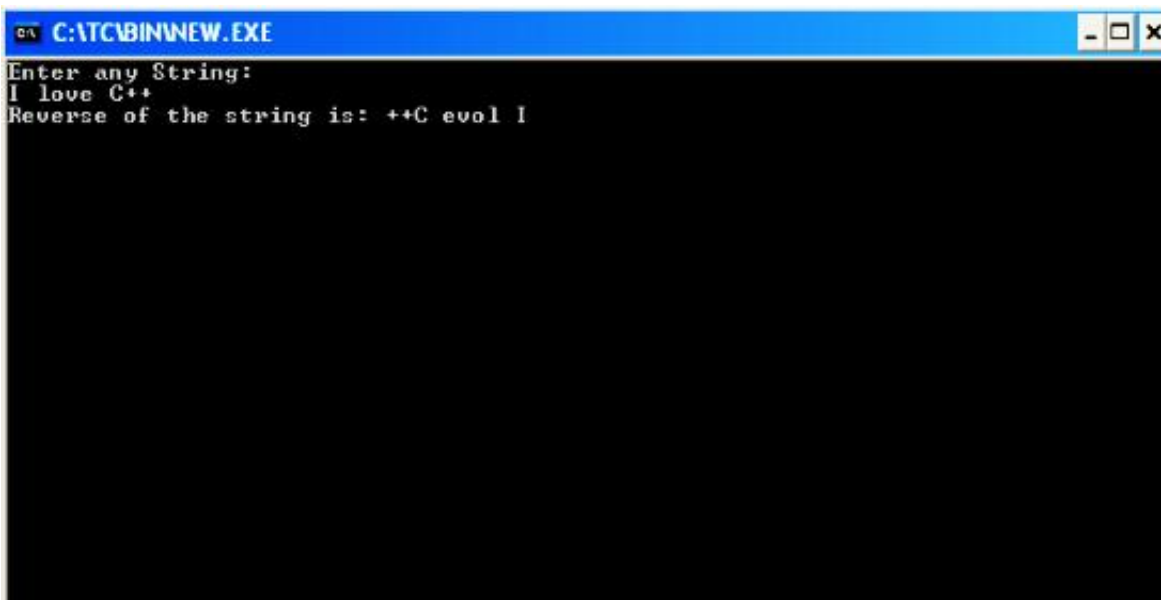

1. [string](#)
2. [stringa estrai in inglese](#)
3. [string c++](#)

A string and an int are two incompatible types of things You can't concatenate them.

string

string, string theory, string to int, string to json, string contains python, string contains javascript, string to datetime python, string to int python, string to int javascript, string to number javascript, stringi, string c++, string length, stringi damskie, string replace, string to int c++, string split

You must first convert the int to a string You can have cout do it for you: cout and use a string stream.

```
C:\TC\BIN\NEW.EXE
Enter any String:
I love C++
Reverse of the string is: ++C evol I
```

stringa estrai in inglese

string c++
